

Ziltek is a leading provider of waste remediation solutions.

Since 2006, we have provided successful remediation solutions to a wide range of clients including environmental consultants, remediation contractors, land owners and government agencies.

We have successfully managed a wide variety of wastes including contaminated soil, industrial by-products, silts, sediments, mine tailings, and organic residues.

We have provided solutions for a wide range of environmental contaminants including cyanide, arsenic, lead, zinc, copper, mercury, poly-aromatic hydrocarbons and petroleum hydrocarbons.

Our successful business model is based on a unique combination of highly qualified and experienced staff with economical, technically proven, and sustainable technologies.

Our key executives have more than 18 years combined experience in waste remediation and all have PhD level technical qualifications.

Products and Services

We offer clients a complete range of waste remediation products and services.

Key Services:

- Waste sampling and analysis
- Waste treatment optimization trials
- Waste reviews and audits
- Regulatory approvals for remediation technologies
- Technology commercialisation
- Occupational health and safety guidance.
